

## Virtual Speaker Series

**FREE & Open to Public**  
**PRE-REGISTRATION REQUIRED**

Friday, Sept. 9 3 p.m

### What is Cruising?

Have you ever wondered what it's like to live aboard a small boat and travel to foreign shores? Our speaker and her husband did just that. They spent four years on a sailboat. Her presentation shows the good, the bad, the ugly, and the sublime of cruising through Central America, the Caribbean, and the US East Coast.

**Laura Fortune**

*Stockton native Laura Fortune has always been around boats and first sailed to Mexico in 1981. After retiring, she and her husband embarked on an open-ended cruise that took them through the Panama Canal and eventually up to Maine.*

Friday, Sept. 16 3 p.m

### Indigenous Peoples

The peripheries of the Sacramento-San Joaquin Delta were home to many Native nations. The region was the most densely populated area in North America except for Central Mexico prior to the European invasions. The presentation will show how Indigenous nations lived in large year-round towns and carefully managed habitats to sustainably maximize important plants and animals. Examples will illustrate cultural innovations that spread from the Delta to other areas of California.

**David Stuart**

*David Stuart recently retired as director of the San Joaquin County Historical Society and Museum (in Micke Grove Park). He led the expansion and updating of the Native Peoples exhibition there and wrote the two-volume book, *The Native Peoples of San Joaquin County*.*

Friday, Sept. 23 3 p.m

### Online Safety, Security and Privacy

Scared to go online because of hackers and viruses? Don't be. This engaging lecture about online safety will help you stay safe with up-to-date advice on avoiding viruses, spyware, junk mail, phishing, and more. You'll learn how to be smart about your password while keeping your computer safe.

**David Diskin**

*Through his business, Applied Office, David has been teaching about technology and Microsoft Office applications throughout the country since 2005. He is a frequent lecturer for the University of the Pacific's OLLI program and lives in Lodi, CA.*
